PROJECT

Caber | College Team Project

2023-2025

Cab booking website

- Developed a full-stack cab booking platform using the MERN stack, allowing users to book rides with ease. Implemented role-based authentication using JWT for secure access. Integrated Google Maps API for real-time location tracking and fare estimation. Designed an intuitive UI with React and optimized backend performance with Node.js and Express. Utilized MongoDB to manage ride and user data efficiently.

Traveling Tracker | Smart India Hackathon

Sep 2024- Dec 2024

City bus tracking system

- Developed a web-based city bus tracking system using HTML, CSS and JavaScript. Integrated Google Maps API for real-time bus location tracking and estimated arrival times. Implemented a user-friendly interface to search routes, view nearby bus stops, and plan journeys efficiently, enhancing public transit accessibility.
